ARIYA Bumper Refinishing Requirements
Reference: NPSB/26-970
Date: January 1, 2026

TO: COLLISION REPAIR INDUSTRY

POSITION STATEMENT: ARIYA Bumper Refinishing Requirements

FRANKLIN, TN—Nissan North America, Inc. continues to develop some of the most innovative vehicles in the world that are focused on driver and occupant safety. As these vehicles are developed, increased focus on advanced safety systems and advanced driver assistance system (ADAS) features will be a natural byproduct of these advancements. Technologies included in these ADAS systems require specialized repair precautions and attention to detail in collision repair.

Improper repairs, excessive paint thickness, and bumpers that are painted more than once may result in system degradation and inaccuracy of the ADAS system, which may cause unintended system warnings or other malfunctions. Please refer to the Electric Service Manual for further details.

For ARIYA vehicles with damage in the side radar zones of the bumper the use of approved materials and processes is necessary to avoid interference with the side radars' and ADAS function. Repair materials (such as putties or fillers) may not be added to the original bumper in the side radar zones. Repairs in the radar zones will require bumper replacement with a Genuine Nissan Part.

Approved Paint Supplier and Product Lines

To ensure optimal performance and compliance in accordance with the Nissan standards please refer to the Electronic Service Manual in addition to the paint supplier's website and technical information for radar compliant product lines and color formulations. This document replaces the guidance in NPSB/22-667.

Post-Repair Scan

After all repairs are completed, the vehicle must have a post-repair diagnostic system scan that can properly identify ARIYA systems and properly determine whether those systems are functioning as necessary. At this time, only CONSULT 4 and VI3 can be used on ARIYA. Please reference the [OEM Repair Procedures and Guidelines](#) statements for additional information.

Parts Warranty

Nissan North America Inc.'s New Vehicle Limited Warranty and Limited Warranty on parts are set forth in each model's warranty information booklet. The warranty information booklets should be consulted to understand warranty coverage and exclusions in terms of the parts used in repairing Nissan vehicles.

For additional collision information: Collision.NissanUSA.com

Refer to the Electronic Service Manual (ESM) prior to any repair or replacement being performed. Information specific to each model may be found at
